

FINANCE MODULE · LESSON: ESTIMATE AT COMPLETION (EAC)

Contract Funding Page: Example

Enterprise Cyber Range Support (ECRS): Task Order TO-0043, Contract N00XXX-25-D-0091

Contract / TO Number	N00XXX-25-D-0091 / TO-0043
Contract Type	Firm-Fixed-Price (FFP)
Contractor	Example Contracting Corp
Period of Performance	01 Oct 2025 – 30 Sep 2026
Contracting Officer	Taylor Brooks
COR	Casey Nguyen

Contract Structure: The Uniform Contract Format (UCF)

Every negotiated federal contract that uses the Uniform Contract Format (FAR 15.204-1) is built from the same set of lettered sections, grouped into four parts. The funding page you are about to read lives inside **Section B**, highlighted below, but knowing where it sits relative to the rest of the contract is what turns "reading a table" into "reading a contract."

PART	SEC.	TITLE
I: The Schedule	A	Solicitation / Contract Form
I: The Schedule	B	Supplies or Services and Prices/Costs (this document)
I: The Schedule	C	Description / Specifications / Statement of Work
I: The Schedule	D	Packaging and Marking
I: The Schedule	E	Inspection and Acceptance
I: The Schedule	F	Deliveries or Performance
I: The Schedule	G	Contract Administration Data
I: The Schedule	H	Special Contract Requirements
II: Contract Clauses	I	Contract Clauses

PART	SEC.	TITLE
III: Attachments	J	List of Attachments
IV: Reps & Instructions	K	Representations, Certifications & Other Statements
IV: Reps & Instructions	L	Instructions, Conditions, and Notices to Offerors
IV: Reps & Instructions	M	Evaluation Factors for Award

Section B is short on its own (it is mostly a pricing table), but it never stands alone. Section C tells you what the work actually is. Section F tells you when it is due. Section G tells you who administers the money. Section B is simply where the price tag for all of that gets attached, broken out by CLIN.

Section B: Supplies or Services & Prices/Costs

Each CLIN below is its own funded line item, with the full set of fields a real Section B carries: the SOW reference, Product Service Code, Pricing Arrangement, ACRN, PR Number, and the Contract/Funding Instrument Number (CIN). "Firm Price" is the total negotiated value of that CLIN. "Funded Amount" is the dollar value actually obligated right now, the number a contractor can legally bill against today.

ITEM	SUPPLIES / SERVICES	QUANTITY	UNIT	UNIT PRICE	AMOUNT
0001	Labor - Firm Fixed Price (FFP): ECRS Program Management & Cyber Range Operations The contractor shall provide labor in accordance with (IAW) the SOW, Attachment 1. Product Service Code: R497 Pricing Arrangement: Firm Fixed Price ACRN: AA PR Number: N00XXX-26-RC-0091 PR Line Item Number: 0001 CIN: 00000000000029481027	12	Months	USD 64,300.00	Firm Price USD 771,600.00 Funded Amount USD 771,600.00
0002	Labor - Firm Fixed Price (FFP): ECRS Range Systems Engineer The contractor shall provide labor in accordance with (IAW) the SOW, Attachment 1. Product Service Code: R497 Pricing Arrangement: Firm Fixed Price ACRN: AB PR Number: N00XXX-26-RC-0092 PR Line Item Number: 0001 CIN: 00000000000029481058	12	Months	USD 58,900.00	Firm Price USD 706,800.00 Funded Amount USD 530,100.00

ITEM	SUPPLIES / SERVICES	QUANTITY	UNIT	UNIT PRICE	AMOUNT
0003	Travel - Firm Fixed Price (FFP): ECRS Site visits supporting range exercises Government required travel in support of the implementation of the cyber range environment, in accordance with the SOW, Attachment 1. Invoicing approved after completion of each trip. Product Service Code: U012 Pricing Arrangement: Firm Fixed Price ACRN: AA PR Number: N00XXX-26-RC-0091 PR Line Item Number: 0002 CIN: 000000000000029481077	18	Each	USD 3,215.00	Firm Price USD 57,870.00 Funded Amount USD 57,870.00

Figures above are illustrative and rounded for teaching purposes.

Acqlerate

How to Read This Page

- **CLIN 0001** is fully funded: Firm Price and Funded Amount are identical (\$771,600). The full value of this line has been obligated up front.
- **CLIN 0002** is incrementally funded: Firm Price is \$706,800, but only \$530,100 has been obligated so far. That is exactly nine of its twelve months ($\$58,900 \times 9$), so the money covers work through 30 June 2026 and not a day more. DoD can only do this on a fixed-price line in narrow cases, such as a year or less of severable services like this one (DFARS 232.703-1).
- **CLIN 0003** (Travel) is fully funded like CLIN 0001, showing that funding status is set per CLIN, not per contract.
- **ACRN AA** covers CLINs 0001 and 0003, meaning they draw from the same funding action. **ACRN AB** is a separate funding line covering CLIN 0002 only, likely a different fiscal year or a later funding modification.

THE CLAUSE THAT MAKES THIS REAL

An incrementally funded fixed-price contract at DoD carries DFARS 252.232-7007, Limitation of Government's Obligation. Two rules matter. First, the contractor must warn the CO in writing at least 90 days before what it has earned on the line reaches about 85% of the funded amount. Second, the contractor is not authorized to keep working past the funded amount, and the government doesn't owe it anything if it does. Here, 85% of \$530,100 is \$450,585, which billing reaches around 20 May 2026. Count back 90 days: the letter is due around 20 February, month five of twelve. Don't mix it up with FAR 52.232-22, Limitation of Funds. That one is for cost-reimbursement contracts and has its own trigger: costs expected in the next 60 days pushing past 75% of the funded amount.

FROM LUCAS

CLIN 0002 is the one to watch on this page. A PM tracking the \$706,800 price thinks there's plenty of room. A PM tracking the \$530,100 actually funded knows the money runs out at the end of June, and that the warning letter was due back in February. If you're writing that letter in June, you're four months late and about to work for free. Price tells you what's possible. Funded tells you what's real. Track funded. Every time.
